DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18, drawn to an invention for emergency response and dispatching for location and event monitoring, classified in class 340, subclass 3.1.
 - II. Claims 19-63, drawn to an invention for monitoring gathering, and reporting event information, classified in class 340, subclass 521.
 - III. Claims 69-75, drawn to an invention for tracking events utilizing cameras, classified in class 340, subclass 539.25.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions because group I pertains to a system monitoring events at a location and dispatching appropriate personnel to the location as necessary, wherein group II pertains to a system in which event information at a particular location is gathered and reported for processing at other locations. Group III pertains to surveillance and tracking of events at particular locations utilizing cameras for monitoring purposes.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
